ABOUT OUR FIRE STATION

The Queenstown Volunteer Fire Company was established in 1934 and built the original fire station in 1935 for a cost of \$3,500.00. The station was added to in 1952 which allowed for two apparatus bays. In 1982 the station was expanded to a three-bay station and the second story was also expanded and remodeled. During the 1990's the company acquired an adjacent building and constructed two additional bays allowing for five total engine bays.

The company acquired 2.5 acres of land in January 2023 for the construction of a new modern fire station that is expected to cost several million dollars.
